This book was a powerful book I say this because Blossom teaches girls not to just be some girl that you can just walk all over This book deals with family, friendship, love, and self respect Blossom lives with her sister for all her young life after there mother is got up and just left them one day Blossom and her sister grow a close reliaship not only together but with 5 other girls from around there way they all are like sisters They look out for each other and they teach each other about the wrong and the right in life Blossom is the youngest of the group so they look out for her even When one of the girls in the group is murdered there friendship is tested When they find out that the girl who died was killed because of Blossom they all turn on her Blossom was spoose to die not the other girl all the girls even her sister turned on her Blossom is now alone and looking for love but in the wrong places When she meets Dude a big time drug dealer she falls in love with him When murder comes knocking on her door again its not her family this time its his When Dude brother is murdered Dude turnes his back on Blossom and once again she is alone and by her self Instead of her looking for love again she gets her life on track again and goes back to school When Dude realize what he has done that he pushed away the only girl that he ever loved he try s to get her back but she stands up for her self and leaves him alone because if you could leave the one you love that fist then you must don t love them that much I love this book because you could never tell what she was about to do it was like is she going to get back with him What is she going to do about her family problems does she blame her self for her friends murder What is she going to do next was the big question of the book

I loved this book but I was disappointed because the Author leaves you hanging at the end and never finishes the story. Well, it's been almost 4 yrs and she has not wrote the 2nd series. I gave up on this one. I think she would of done great book sales if she would of finished.

Out of the three books i have read, i would recommend this to everyone. This book is down to earth and will capture a lot of people s attention. This book will interest you and make you want to keep on reading once you have read the first page.

When I first saw this book, I had such High expextations for it, But I was disappointed when I began reading it. The storyline was so common and the Characters didn t have that UNF that seperated them and madethem unique.
