suo agio in questi racconti lunghi, o romanzi brevi novelle , sia quando ci porta in US, sia quando invece ci trasporta in Inghilterra, a Roma, in India, in Thailandia Senza mai scadere nel folklorico, nel pittoresco, nel fastidiosamente etnico E, pure se il primo racconto, quello che da il titolo all intera raccolta, insuperabile, il fascino della lettura cresce pagina dopo pagina.E alla fine, non ci si vorrebbe separare da queste storie, da queste vite, cos lontane, cos vicine Cos nostre. These eight short stories by Jhumpa Lahiri are quiet, penetrating, and meticulously written The first five stories are distinct, while the last three are interrelated Lahiri s prose seems so clean and precise that it is very easy to turn page after page despite the fact that her stories are not really plot driven Rather, each story delves into the psyche of each character with such skill that the reader can t help but feel extremely intimate with each one, whether male or female, likable or otherwise Lahiri s characters are predominantly Bengalis that have moved from India to America Some of her protagonists are the children of these Bengalis and themes may focus on the struggle to assimilate and the conflicts between the values of the parent and the desires of the children to pave their own way These and other themes feel far reaching, however, and the reader may recognize and understand many of the feelings, battles and tensions quite personally Mother daughter relationships as well as other parent child connections, alcoholism, illness, raising children, love, marriage, separations, and death are all deftly scrutinized Overwhelmingly, however, I recognized a sense of melancholy and loneliness in these characters as they sought to belong and to pursue their dreams One of my favorite stories in the collection was the title story Unaccustomed Earth , one about a young mother, Ruma, who renews her relationship with her father after her mother s death not a spoiler Ruma sets aside her career to move across the country to raise her young family She craves a sense of happiness that seems always out of reach A visit from her previously aloof father sheds a different light on this parent as the daughter watches him form a strong and loving bond with his grandson Growing up, her mother s example moving to a foreign place for the sake of marriage, caring exclusively for children and a household had served as a warning, a path to avoid Yet this was Ruma s life now He wanted to shield her from the deterioration that

inevitably took place in the course of a marriage, and from the conclusion he sometimes feared was true that the entire enterprise of having a family, of putting children on this earth, as gratifying as it sometimes felt, was flawed from the start. The last three, interrelated stories are probably the most poignant of all. Hema and Kaushik, also the names of the two protagonists, covers an expanse of time from when the two meet as children until their paths cross once again later in life on another continent. As children, Hema and Kaushik are forced together by circumstances and a friendship between parents which develops out of a sense of a need to belong than to a true sense of affinity. Kaushik has a strong attachment to his mother and this will affect his choices and his feelings right into and through adulthood. A chance encounter brings Hema and Kaushik back together after many years. What draws one person to another? Is it destiny or some link to one's past that can't be severed? Their parents had liked one another only for the sake of their origins, for the sake of a time and place to which they'd lost access. Hema had never been drawn to a person for that reason, until now. I highly recommend this book if you enjoy short stories that have a wealth of depth despite their length, characters that are superbly drawn, and wonderful writing. Based on the first story and last set of stories, I would rate this book with 5 stars. However, as not all stories within the collection were right at the 5 star mark, although certainly worthy in their own right, I am giving this 4 stars. This is not my first Lahiri work and will most certainly not be my last. A real disappointment after her first two books. Doing away with both the emotional gut punches of displacement and desperation found in *Interpreter of Maladies* and the elegiac generational sweep of *The Namesake*, Lahiri in *Unaccustomed Earth* zeroes in on the least interesting dimension of her usual subjects: the interior monologues of fully assimilated, second generation Indian Americans who are ungratefully dissatisfied with their lives of privilege. Her formerly melancholic insight and pungent descriptions have given way to stale, distant whiffs of unpleasantness that lack gravity and empathy. Nothing but an elegantly written snooze. I have often stated that I do not enjoy short stories, but although this is designated as such, it oversimplifies the content of this book. With understated elegance, Lahiri has drawn in the reader to become immersed

in tales of families, lovers and friends She has the unique ability to simply, but fascinatingly communicate the features of the characters behaviors, thoughts and emotions In addition, she is able to express such dimensions so well that I felt I had become acquainted with these people I was immediately captivated by her style and the tales that she wove It was an emotional experience for me to read each story, from sheer delight, or humor, to grief and regret Jhumpa Lahiri has written a beautiful book which I did not want to end. It didn't matter where she was in the world, or whether or not she was dying she had always given everything to make her homes beautiful, always drawn strength from her things, her walls But Kaushik never fully trusted the places he'd lived, never turned to them for refuge From childhood, he realized now, he was always happiest to be outside, away from the private detritus of life In each of the eight stories in this collection by Pulitzer Prize winning author Jhumpa Lahiri, the characters are displaced Whether physically, moving from one country to another mostly looking at the Indian immigrant's experiences in America or figuratively, in a relationship torn asunder or strained by life's difficulties And in each of them Lahiri expertly captures the emotions these characters go through, from jealousy and outrage to sorrow and desperation In all of them she conveys so pointedly the irony of life that even in painful moments, there's a sort of joy in knowing you at least feel something It's this human experience, a sort of self-inflicted suffering, that Lahiri encapsulates in words what so many authors try yet fail to do. The title story sees a daughter, now a mother and new resident of Seattle, welcoming her globetrotting father into her home It explores the complexities of growing up and cleaving from your family to form your own Only Goodness explores the responsibility of siblinghood, of past actions and their present consequences And Nobody's Business takes on the commitment two people have for one another romantic or otherwise when choosing to share life together The final three stories of the collection, in Part Two Hema and Kaushik, look at the decades and unfolding events in the lives of two immigrant children These were my personal favorite Lahiri allows the reader into intimate moments, even unflattering ones, in a way that makes them so profoundly real I am nearly convinced these characters have walked off the page into the world Not

since Adichie's *Americanah* have I felt so strongly. Needless to say, Lahiri has made her way onto my favorites shelf with this collection. If you read and loved *Interpreter of Maladies*, this is a must read. Not questions asked 5 stars. Eight short stories of remarkable depth, richness and resonance. Part one consists of five stand alone stories, some of which have the density of novellas. Part two consists of three stories that chronicle several decades in the lives of two characters whose lives have been fatefully intertwined. Lahiri's protagonists might all be Bengalis from India taking root in America and then often abroad, but their secrets, hopes and dreams are universal. The stories' endings are particularly powerful, full of surprises that never feel gimmicky. Stylistically, these are old-fashioned stories you can see and feel Lahiri's debt to writers like William Trevor and Mavis Gallant in her clear, concise, insightful prose. There's little experimentation with form, and there's a certain sameness to settings and backgrounds: New England or New York City, ivy league colleges. She's equally good getting into the skin of men or women, young or old. Like priceless gems, though, these stories seem simple and lovely on the surface but are carefully cut, chosen and polished, hiding layers of mystery. As I progressed through the first four stories, I became angry. I couldn't understand why Lahiri would put out another book that was almost identical to her first. She seemed to have retreated even further into her safe space, writing only about Bengali Americans who study at ivy league schools, have well-educated albeit maladjusted parents and struggle with redefining relationships after relocation. I expected a lot when I read the title and its reference to Nathaniel Hawthorne's quote. I expected she'd do justice to the idea, but nope. The themes are repetitive and hackneyed, the female characters are extremely weak which bothered my feminist sentimentality. No end and alcohol abuse seems to have become her chosen metaphor for all inner turmoil. In fact, she doesn't even do justice to the same hackneyed themes she addresses: relationships, father-daughter, brother-sister etc but doesn't address any of the other usual suspects when it comes to immigrant struggles: race, sexuality, discrimination, social-cultural identity etc. On the other hand, the writing was fluid and at some points, I found her flair for tragedy quite impressive. She does address some of the darker aspects of loneliness,

human awkwardness and tragedy especially delicately and manages to bring across her idea without unnecessarily complicating and cluttering her writing. Perhaps a new term needs to be used for short stories such as these Each one is jam packed with details that never bog down each one is as dense and rich as a novel The writing never falters it is always smooth, flowing and self assured.Of course the last 3 stories could be a novella, and we are lucky not to have to buy a separate book to experience them.Wonderful characters, wonderful stories, wonderful writing.
